Summer News

1 New products and experiences

1.1 Aletsch Arena MTB Cable Car Tour

This summer, the Aletsch Arena is launching the Aletsch Cable Car Tour in conjunction with the Ride-Magazin team. The Cable Car Tours are the enduro highlight of the Alps. Thanks to the gondola lifts, you can pack the maximum amount of downhill fun into one day. All descents are on single trails and no route is ridden twice. The Aletsch Arena in Valais is among the very best when it comes to scenery and single trails. And with the feeder lifts up to the high plateau of Fiescheralp, Bettmeralp and Riederalp, as well as three other cable cars offering bike transport, the region is simply ideal for a cable car tour. Seven extremely long descents and three shorter transfer sections add up to over 10,000 metres of downhill altitude difference.

Route data

m; 10,230m downhill; 690m climb; 10 cable car rides

They provide striking evidence of the unique biodiversity in the Alps, where a wide variety of different habitats can be found in close proximity to each other.
